The InterWork Alliance has Begun Operations!

June 2, 2020, was a pretty exciting day for many people as the InterWork Alliance introduced itself to the world. We always knew we were building something foundational, but the responses have overwhelmed even our own expectations. We have incorporated some of that feedback into this, our first monthly newsletter.

Many thanks to IWA member Nasdaq for acknowledging the IWA launch on their Times Square billboard!
You can view our announcement letter here, as well as some launch-day musings from IWA President Ron Resnick and IWA Director of Marketing Paul DiMarzio.

Microsoft’s Marley Gray, who has taken on the role of IWA Board Chair, has published a two-part blog post describing the thought process that went into the creation of the IWA and its focused set of standards. Part I and Part II are now available for viewing on the IWA web site.

IWA Presents a Blockchain Research Institute

Research Paper on the Token Taxonomy

We recently announced a paper from IWA associate member Blockchain Research Institute titled Token Taxonomy: The Need for Open-Source Standards Around Digital Assets. The paper is authored by Don Tapscott, executive chairman and co-founder of the Blockchain Research Institute (BRI).

Don, as a long-time advocate of global solutions networks for standards development like the IWA, wrote this research paper as a thoughtful review of the Token Taxonomy Framework, now under the aegis of the IWA. Because IWA standards are platform-neutral, many tokens defined under these standards will be implemented on a variety of blockchain platforms. Therefore, to underscore the importance of standards in advancing blockchain technology, the BRI and IWA are making this important piece of research available to the IWA community under a Creative Commons license. It is prerequisite reading for business leaders interested in IWA’s work.

Welcome New Members!

The IWA is a member-led industry organization, where every member has an equal voice in moving objectives forward. Our members are thought leaders from around the globe with a shared vision to create enterprise-ready solutions that are neutral, competitive, and embody a credible market view. We are very pleased to welcome all the members who have joined us during these first two months of our operations.

IWA Technical Director Ramesh Ramadoss presented standardization for the European Commission Webinar Joining Forces for Blockchain Standardisation.

June 22, 2020

The IWA’s Ron Resnick, Ramesh Ramadoss, and Paul DiMarzio, and Microsoft’s Marley Gray (IWA Board Chair), delivered out first webinar – Introduction to the InterWork Alliance - Simplifying the World of Token-Powered Digital Interchange – to show first hand how the IWA is simplifying token-powered digital interchange. In this webinar, we introduced viewers to the IWA’s organizational structure, its technical goals and objectives, and the value of being a member. Click here.

Introducing the IWA Sustainability Business Working Group

This week, we announced the formation of our Sustainability Business Working Group, which will focus on making the tokenization of sustainability business use cases possible through standards and a trusted certification program. To date, there is no global standard solution for tokenizing the outcomes of accounting processes designed to track greenhouse gas emission reductions in the form of offsets or credits. By developing a technology-neutral standard for tokenizing emissions and offsets, along with contractual requirements to operate against these tokens, the IWA can dramatically accelerate the implementation and interworking of carbon markets - both voluntary and regulated - using distributed ledger techniques.

• Register for the webinar Unlocking the Business of Sustainability Through Tokenization, hosted by Chair Marley Gray, August 13, 2020, at 1:00 pm. Eastern.

Not a member yet?

The InterWork Alliance (IWA) is a non-profit, member-led organization creating platform-neutral specifications and trusted certification to define how digital token business processes can interwork regardless of location or market segment. By focusing on real-world projects, market requirements, and performance metrics, the IWA will define tokenization and interworking standards to drive business-level interoperability, multi-party interchange, and trust across applications and networks.
